ABOUT ME

Automation Architect & Technical Lead | RPA | UiPath | Power Platform | Python | Solution Architecture | Process Optimization | Data & Automation

I am an Automation Architect and Technical Lead with 10+ years of experience across automation, software development, data, and business process optimisation.

At KPMG Bulgaria, I lead end-to-end automation programmes, combining solution architecture, technical leadership, stakeholder management, and hands-on development. My technology stack includes UiPath, Microsoft Power Platform, Python, APIs, SQL, Power BI, Power Query, DAX, and VBA.

I specialise in bridging business requirements and technology, designing scalable and maintainable enterprise automation solutions from process discovery and architecture through development, deployment, governance, and production support.

Open to opportunities in Automation Architecture, Solution Architecture, Intelligent Automation, Technical Consulting, and Technical Leadership.

WORK EXPERIENCE

KPMG Bulgaria - Bulgaria, Sofia

Manager, RPA

[30 Sep 2025 - Current]

- Lead end-to-end automation initiatives, from process discovery and solution architecture through development, deployment, and production support.
- Design scalable automation solutions using UiPath, Python, Microsoft Power Platform, Excel, Power Query, APIs, SQL, and related technologies.
- Lead and mentor an RPA team, providing technical direction, solution reviews, development standards, and capability development.
- Define automation architecture, governance, security, and lifecycle standards, while translating business requirements into practical technical solutions.
- Drive continuous improvement of the automation landscape, production operations, and delivery processes across business and technology stakeholders.

KPMG Bulgaria - Bulgaria, Sofia

Associate Manager 2, RPA

[30 Sep 2023 - 31 Aug 2025]

- Designed RPA solutions and automation architectures aligned with CoE standards, business requirements, scalability, security, and maintainability.
- Led process discovery and solution design, translating business requirements into workflows, technical specifications, user stories, and implementation plans.
- Coordinated between business, IT, and delivery teams throughout development, testing, UAT, deployment, and rollout.
- Provided technical guidance to RPA developers, supporting solution quality, development standards,

troubleshooting, and continuous improvement.

KPMG Bulgaria - Bulgaria, Sofia

Associate Manager 1, RPA

[30 Sep 2021 - 31 Aug 2023]

In addition to the RPA Developer role I am also responsible for:

- Designed RPA solutions based on business requirements, process analysis, and established CoE architecture principles.
- Worked closely with business and IT stakeholders to identify automation opportunities, define requirements, and translate processes into technical solutions.
- Created solution designs, process models, technical documentation, user stories, and acceptance criteria for automation projects.
- Supported development, testing, UAT, deployment, and rollout, ensuring solutions were maintainable, reliable, and aligned with business needs.
- Analyzed process and technical gaps and recommended automation and process improvement solutions.

KPMG Bulgaria - Bulgaria, Sofia

Senior RPA Developer

[31 Jan 2020 - 31 Aug 2021]

- Led the technical development of RPA solutions, including process analysis, automation design, development, testing, deployment, and optimization.
- Built RPA solutions from scratch, including attended, unattended, and orchestrated robots using UiPath and Power Platform.
- Analyzed business processes and requirements and translated them into scalable, maintainable automation solutions.
- Designed, built, and configured automation workflows according to business and application requirements, applying core workflow and software development principles.
- Worked with UiPath, Power Platform, and VBA to automate business processes and integrate automation into existing application environments.
- Provided technical guidance and support to other developers, sharing best practices for development, solution design, troubleshooting, and maintainability.
- Contributed to the establishment and improvement of development standards and practices for the RPA team.

GfK - An NIQ Company - Bulgaria, Sofia

Specialist Time & Utilization Management, Controlling Shared Services (Part-time)

[29 Feb 2020 - 31 Mar 2025]

- Managed the production of global management Scorecards, supporting management reporting across GfK companies and regions worldwide.
- Maintained and continuously optimized an Excel-based reporting solution using VBA, automating data processing, report generation, and distribution.
- Generated and distributed hundreds of recurring management reports to global, regional, and local stakeholders.
- Worked with data from multiple source systems, transforming and consolidating it into standardized management reporting.
- Ensured the accuracy, consistency, and timely delivery of reporting outputs while supporting changes and improvements to the reporting process.
- Worked with SAP, BEx Analyzer, SQL, Excel, VBA, and

GfK - An NIQ Company - Bulgaria, Sofia

Specialist, Controlling

[31 Mar 2018 - 31 Jan 2020]

- Produced and maintained daily, weekly, monthly, and quarterly management reports for international stakeholders.
- Automated and optimized reporting processes using Excel VBA, Power Query, SQL, and SAP/BEx Analyzer.
- Maintained and improved reporting templates and Scorecards covering Pipeline, Utilization, KPIs, and other management metrics.
- Collected, transformed, and validated data from multiple systems, ensuring accurate and consistent reporting outputs.
- Provided reporting support and troubleshooting while managing changing priorities in a global, virtual environment.

GfK - An NIQ Company - Bulgaria, Sofia

Junior Specialist, Controlling

[30 Nov 2015 - 28 Feb 2018]

- Produced and maintained recurring management reports and Scorecards, working with data from multiple systems and international stakeholders.
- Supported the optimization and automation of reporting processes using Excel, VBA, SQL, and Power Query.
- Performed data validation, reporting troubleshooting, and process improvements to ensure accurate and timely delivery.
- Supported reporting requirements and changes across a global, virtual working environment.

GfK - An NIQ Company - Bulgaria, Sofia

DP Specialist / Junior Specialist / Senior Executive

[30 Nov 2011 - 30 Nov 2014]

- Took technical ownership of the CE Pricing Sheets (CEPS) project, maintaining and updating Excel-based templates used across the organization.
- Implemented changes and improvements to reporting templates based on business requirements and process needs.
- Generated and maintained management Scorecards covering Pipeline, Utilization, and 360-Degree View reporting for GfK companies, regions, and sectors.
- Automated and optimized recurring reporting activities using Excel and VBA, improving the efficiency and consistency of the reporting process.
- Supported users with reporting issues, data validation, and process improvements.
- Distributed recurring management reports to international stakeholders and supported changes to reporting requirements.
- Processed market research data and prepared output tables for analysis using QUANTUM and SPSS, following strict quality standards.
- Developed and maintained Excel VBA macros to automate and optimize recurring data processing and reporting activities.
- Performed quality control of outputs and ensured accurate delivery within strict deadlines.
- Communicated with international clients and project managers to clarify requirements and resolve data-related issues.

Partner Travel - Bulgaria, Sofia

IT Administrator

[31 Mar 2010 - 29 Feb 2012]

- Administered the company's website and supported day-to-day IT operations, including computers, printers, telephones, and office systems.
- Created and maintained web banners, flyers, and other digital materials for company communications and marketing.
